# DAIHAN NEW Generation 500 °C High Temp. Digital Hotplate Stirrers

## Hotter! Stronger! **MaxTir™ 500** High-Temp Hotplate Stirrer

MSH-20D, launched in 2004 by DAIHAN Scientific, was the **1st Digital Hotplate Stirrer in the market** with temperature/rpm display, digital feedback control, timer function and simple external pt100 sensor connection. Though it's not made by IKA or by Corning, **80,000+** plates have been sold to the world-wide customers for the past 10 years, and **1,000** plates are still being sold every month. It is unbelievable, isn't it? How was it possible? Based on the philosophy of **User-Friendly Design** and **Cutting-Edge Digital Technology**, it offers **more functions and conveniences** for user's lab work, with lower cost, than others.

Added to the Unique User Convenient features of DAIHAN, the core performance of Hotplate stirrer, **Heating & Stirring**, is dramatically improved. Experiencing this **Max Convenience & Performance MaxTir™ 500**, nothing better than this is needed.
